# MAMMALS

Forty-four species of mammals have been identified at Cheyenne Bottoms Wildlife Area. After birth, young of all species, except opossums, nurse outside their mother's body. Newborn opossums nurse from within their mother's pouch for about 80 days. Diets of mammals at the Bottoms vary. Members of the Leporidae, Castoridae, Geomydidae, Heteromydidae, Muridae (except muskrats), and Cervidae families eat only plants. Shrews, badgers, minks, and bobcats eat primarily other animals. Opossums, coyotes, raccoons, and skunks eat a variety of animal and plant foods. Members of the Leporidae, Sciuridae, Geomyidae, Heteromyidae, and Muridae are preyed upon by raptors, coyotes, red foxes, raccoons, badgers, striped skunks, and bobcats.
