Kingman State Fishing Lake and Byron Walker Wildlife Area are located on U.S. Highway 54 seven miles west of Kingman, along the South Fork of the Ninnescah River. The area encompasses 4,685 acres, including the 144-acre Kingman State Fishing Lake constructed in 1933. The area offers a wide variety of hunting and fishing. Campers, hikers, and bird watchers will also find the area attractive.

FISHING

Kingman State Fishing Lake offers excellent fishing for largemouth bass, crappie, and channel catfish. Other species stocked in the lake include bluegill, redear, and northern pike. Special length and creel limitations apply to the area. Lures and minnow imitations caught year-round near any cover type using various techniques as well as a 2-1/2 to 3 pound sinker can be used to locate fish. The 144-acre Kingman State Fishing Lake provides good fishing for channel catfish and flathead catfish. These are indicated on the map and can provide excellent fishing. The Ninnescah River offers some exciting diversity on the area. The west 1/3 of Kingman State Fishing Lake is open to waterfowl hunting, with the remainder of the lake managed as a refuge. In addition, eight marshes are located north and west of the lake and three more lakes are located south of the lake on the south side of Highway 54. The Ninnescah River and a dozen or more ponds are also open to waterfowl hunting. Additional ponds and windmills can offer exciting pass shooting opportunities for doves. Dove hunting can remain good through early October. Waterfowl hunting offers some exciting diversity on the area. The west 1/3 of Kingman State Fishing Lake is open to waterfowl hunting, with the remainder of the lake managed as a refuge. In addition, eight marshes are located north and west of the lake and three more lakes are located south of the lake on the south side of Highway 54. The Ninnescah River and a dozen or more ponds are also open to waterfowl hunting.

HUNTING

The diverse habitat on Byron Walker Wildlife Area includes riparian woodlands, native prairie, wetlands, and cropland, which makes the area great for hunting a variety of game. Most of the prairie habitat has been enhanced with tree and shrub strips, disked strips, and food plots. The wetlands are managed using moist-soil techniques with millet plantings to attract waterfowl. Crops are also planted to benefit game species. Upland bird hunting is generally good. Quail are the primary species on the area, and numbers are typically good. Pheasants can be found on the area, but numbers are generally low because of the lack of suitable habitat. Hunters with dogs should be careful of traffic on U.S. Highway 54, which runs through the area.

Fox squirrels are abundant in the timbered areas. Black walnut and bur oak trees are attractive to squirrels when bearing nuts and acorns. Cottontails are abundant near clover or alfalfa patches or brushy habitats. Occasionally, jack rabbits can be taken on the area. Hunting with beagles can be very productive. White-tailed deer hunting is very popular on Byron Walker. Numbers are generally good and can be found in every habitat on the area. Bowhunters can improve their shooting skills at the archery range located adjacent to the area headquarters. Turkey hunting is excellent on the area. The special youth/handicap season gives young and handicapped hunters the opportunity to hunt before the regular season opens. Area ponds and windmills can offer exciting pass shooting for doves. Dove hunting can remain good through early October. Waterfowl hunting offers some exciting diversity on the area. The west 1/3 of Kingman State Fishing Lake is open to waterfowl hunting, with the remainder of the lake managed as a refuge. In addition, eight marshes are located north and west of the lake and three more lakes are located south of the lake on the south side of Highway 54. The Ninnescah River and a dozen or more ponds are also open to waterfowl hunting.
