

2014 KS FALL WIHA & GE MOBILE

Note: Google Earth for mobile is currently available on Android devices running Android OS 2.1 or newer and all iOS devices. Some compatibility issues with the latest version of GE mobile (7.0) have been noted on devices running Android OS versions prior to Android 4.0. If your device is running an older version of the Android OS, consider downloading and installing GE mobile version 6.2 as a workaround.

GPS Information & Files

GPS and Google Earth Map Use Policy:

Both the Garmin GPS and Google Earth files that are provided on this page are intended to assist users in identifying the locations of GOWP Parks in GOWP Access (WIHA) properties. While every effort is made to ensure the accuracy of the provided files, changes with regard to tract acreage can and do occur throughout the year. As with the historic hunting files, these maps are intended for use as a general reference. Signs will mark the actual WIHA boundary. In some instances, the boundary may be a creek, river, hedgerow, or crop field where the boundary may be difficult to map. Use posted signs as the final boundaries.

Once removed from the program, mapped WIHA properties will be posted with "No Camp/Disorderly WIHA" signs. Once these signs are posted, access is prohibited. For an up-to-date list of WIHA that have been removed or added see the [2012 WIHA Access Tract List Change](#).

You may access WIHA tracts only during the access dates indicated, and you may hunt only during appropriate season dates, as outlined in the [Hunting and Harvesting Regulations Document](#). Please review the complete WIHA Rules and Information contained in the [Kansas Hunting Rules](#).

Aside from access dates, some WIHA tracts have restrictions prohibiting to some deer hunting. **Restrictions will be posted on the signs and will take precedence over those listed or entered in the maps.** Citizens can be issued for violating these restrictions. When in doubt, ask on the side of caution and avoid entering areas of question until you have checked with a GOWP official.

Once Google Earth is installed on your mobile device, simply navigate to the [WIHA GPS & Info web page](#) in your device's web browser and select the 'Google Earth File Download' link.

Once you have GE Mobile installed on your device and you select the WIHA download link, you will be given two options for opening/downloading the file on your device.

Selecting 'Earth' will automatically launch GE Mobile and display the 2013 WIHA tracts, but this action will not save the file on your device for later use.

Selecting 'Internet' will save the file to the Downloads folder on your device, allowing you to pull up the tracts in GE mobile without navigating to our web page in the future. You will, however, need to locate the Downloads folder (often under Applications) on your device and select the '2013 KS Fall WIHA.kmz' file in order to launch the GE Mobile application displaying the WIHA tracts.

Unless you delete this file from your Downloads folder, you will be able to access it here at any time in the future. Tap the file name to launch GE Mobile and display the 2013 KS Fall WIHA tracts as shown on the following page.

Another option for speedy access to the kmz file is to download the file from our web page on your PC or Mac, then e-mail the file to yourself as an attachment. Then you can simply open the file from your e-mail on your mobile device anytime you want to pull it up in GE Mobile.

Outlines of WIHA tracts are color coded by access period as in the printed hunting atlas, but with transparent red shaded fill for the Archery & Shotshell Only tracts.

Tapping on individual tracts will bring up a screen of tract specific information including the hunting access period, access limitations, likely species to be encountered based on habitat, County, and total acres for the tract.

An interactive tutorial is available in the GE Mobile menu for assistance in navigating within the program.

Field Name	Field Value
ACCESS	Sept. 1 - Jan. 31
NO_FA_DEER	FALSE
YOUTH_AREA	FALSE
SPECIES	P, Q, Dr, Dv
COUNTY	MARSHALL
TOWNSHIP	0010S
RANGE	0060E
SECTION	21
LEGEND_ID	SJ
ACRES	158
