## WHO WE ARE

Since 1951, The Nature Conservancy has been doing work you can believe in protecting the lands and waters that all life depends on. Through grassroots action, TNC has grown to become one of the most effective and wide-reaching environmental organizations in the world working in more than 75 countries and territories. As a science-based organization, we create innovative, on-the-ground solutions to our world's toughest challenges so that we can create a world in which people and nature thrive.

We're rooted in our Mission and guided by our Values, which includes a [Commitment to Diversity](#) and Respect for People, Communities, and Cultures. Whether it's career development, flexible schedules, or a rewarding mission, there's lots of reasons to love life #insideTNC. Want a better insight to TNC? Check out our [TNC Talent playlist on YouTube](#) on [Glassdoor](#).

Our goal is to cultivate an inclusive work environment so that all our colleagues around the globe feel a sense of belonging, and that their unique contributions to our mission are valued. We'll only achieve our Mission by hiring and engaging a diverse workforce that reflects the communities in which we work. In addition to the requirements in our postings, we recognize that people come with talent and experiences outside of a job. Diversity of experience and skills combined with passion is a key to innovation and a culture of inclusion! Please apply – we'd love to hear from you.

## YOUR POSITION WITH TNC

The Southern High Plains Grassland Specialist (SHP Grassland Specialist) is a three-year term position, ideally starting in June 2022, that will implement a spatially focused conservation strategy by supporting landowner efforts to enhance grassland biodiversity in a pilot area within the Smoky Hill River Basin of western Kansas. This strategic approach of coordinating and leveraging existing conservation programs, private and public resources, and conservation anchor properties is necessary to outpace threats within high priority conservation landscapes. In addition, it will help sustain and restore ecological goods and services provided by Southern High Plains grasslands. In the longer term, success in these highest priority landscapes will demonstrate a collaborative model that can be transferred to other communities, resulting in large, interconnected blocks of high-quality grasslands with long-term voluntary conservation.

## ESSENTIAL FUNCTIONS

The SHP Grassland Specialist will provide outreach and technical assistance to private landowners to implement voluntary, incentive-based conservation practices in an approximately 200,000-acre pilot area. The Specialist will meet one-on-one with producers to let them know about priority conservation practices and programs and additional incentive payments available for their operation. Through this outreach, they will work with social scientists to conduct structured interviews and incentive payment applications to help identify and address barriers to participation in priority conservation practices. Directly and by working closely with partner staff, the Specialist will provide conservation and grazing management planning and application assistance with USDA and other programs. They will also coordinate and secure TNC landowner agreements and associated incentive payments. The specialist will work with a network of TNC Southern High Plains Initiative (SHPI) and partner staff to scale up this strategy and assist with interpreting and communicating social science research.

## RESPONSIBILITIES & SCOPE

- Provide outreach and technical assistance to producers for planning, program enrollment, implementation, and follow-up for increased adoption of priority conservation practices.
- Conduct structured interviews with the guidance of social scientists to identify and address barriers to participation in conservation practices, including providing recommendations for creative solutions.
- Assist partner staff (e.g. USDA, Kansas Grazing Lands Coalition, Pheasants Forever) with field data collection, conservation and grazing management planning, and program enrollment.
- Assist with incentive payment applications, ranking, social science research, and communications strategies with TNC and partner staff.
- Assist SHP Grassland Project Manager and partners with efforts to secure funding beyond the current three years of funding.
- Coordinate alignment and assist other TNC staff with conservation easements.
- Make strategic decisions independently and with partners, based on analysis, ambiguous information and context.
- Negotiate agreements in a complex political environment.
- Occasional domestic travel along with evening and weekend hours.
- Work in variable weather conditions, at remote locations, and on difficult terrain.

## MINIMUM QUALIFICATIONS

- BA/BS and 5 years' experience in natural resource management or related field or equivalent combination of education and experience.
- Experience in range management and willing to become proficient in plant identification.
- Experience with Farm Bill programs and practices.
- Experience managing complex or multiple projects, including finances, and coordinating with other professionals and partners.
- Experience using applications such as Microsoft Word and Excel.
- Experience in partnership development with individuals, community groups, and/or government agencies.
- Experience tasks and associated reporting and by reported deadline(s).
- Experience negotiating.

## DESIRED QUALIFICATIONS

- Familiarity with conservation challenges and opportunities in the Southern High Plains of Kansas.
- Ability to explain conservation practices to technical and non-technical audiences.
- Experience with desktop or mobile mapping applications such as ArcGIS or Google Earth.
- Multi-cultural or cross-cultural experience appreciated.
- Experience communicating with farmers and ranchers in meeting and in one-on-one settings.

## ORGANIZATIONAL COMPETENCIES

<b>Builds Relationships</b>	Builds productive relationships by interacting with others in ways that enhance mutual trust and commitment.
<b>Collaboration &amp; Teamwork</b>	Works collaboratively with stakeholders across levels, geographies, backgrounds, and cultures to improve decisions, strengthen commitment, and be more effective.
<b>Communicates Authentically</b>	Communicates proactively and in a timely manner to share information, persuade, and influence with the appropriate level of detail, tone, and opportunities for feedback.
<b>Develops Others</b>	Takes ownership to help develop others' skills, behaviors, and mindsets to help them maximize their workplace contributions.
<b>Drives for Results</b>	Sets challenging goals and objectives based on a strong sense of purpose and high-performance standards and steadfastly pushes self and others for tangible results, while ensuring work-life balance.
<b>Leverages Difference</b>	Demonstrates commitment to harnessing the power of differences strategically; consistently sees, learns from, and takes strategic action related to difference; and demonstrates the self-awareness and behaviors to work across differences of identity and power respectfully and effectively with all stakeholders. Actively seeks to build and retain a diverse workforce and fosters an equitable inclusive workplace by drawing upon diverse perspectives.
<b>Systems Leadership</b>	Thinks and acts from a broad perspective with a long-term view and an understanding of 1) the dynamic nature of large-scale challenges and 2) the need for integrating five key practices: skillfully engaging appropriate people; providing a clear process for change; taking a holistic view of situations; focusing on a small number of strategic actions, while learning from and adapting them over time; and being aware of how one's own thinking or patterns of behavior may be limiting change.
