PERMISSION TO QUOTE

This is an annual report that may contain information that is subject to future modification or revision. Persons wishing to quote from this report, for reproduction or reference, should first obtain permission from the Director of the Wildlife Division, Kansas Department of Wildlife and Parks, 512 SE 25th Avenue, Pratt, KS 67124.

EQUAL OPPORTUNITY STATEMENT

This program receives Federal financial assistance from the U.S. Fish and Wildlife Service. Under Title VI of the Civil Rights Act of 1964, Section 504 of the Rehabilitation Act of 1973, Title II of the Americans with Disabilities Act of 1990, the Age Discrimination Act of 1975, and Title IX of the Education Amendments of 1972, the U.S. Department of the Interior and its bureaus prohibit discrimination on the basis of race, color, national origin, age, disability or sex (in educational programs). If you believe that you have been discriminated against in any program, activity or facility, or if you desire further information, please write to:

Deer Harvest Survey 2021 – 2022

Monitoring harvest is an integral part of deer management for the Kansas Department of Wildlife and Parks(KDWP). Harvest data in conjunction with population monitoring directs more effective harvest goals and regulations. Additionally, hunter activity information increases the ability of deer managers to refine opportunities and adjust harvest goals as part of maintaining sustainable deer populations. KDWP utilizes a post-season harvest survey to gather this data. This survey is administered once deer permit sales are summarized, so that a sample that is proportional to each permit type maybe randomly drawn. The survey period is approximately 21 days long. Participants selected for participation by email receive an initial email, and two follow up emails at one-week intervals if they have not completed the survey. Participants selected for participation by postcard receive one postcard at the beginning of the open survey period. Data summary and analysis was completed using the statistical program R.

The following summary includes information and is organized in the following order: permit sales, deer harvest by species, age, and sex, harvest by weapon type, hunter use, and deer kill on private, public and WIHA properties, season participation, hunter days afield, date of harvest, hunter satisfaction, and a summary of the special section questions. Additionally, an appendix (Appendix 1) includes estimated deer harvest by species, age, and sex for each of the 19 Deer Management Units in Kansas.

This is a summary of the survey data compiled from responses of hunters completing the post-season survey. The accuracy of this summary relies on the accuracy of information provided by participants. When possible, survey responses with information that was not valid were corrected (e.g., a hunter marks one deer harvested but classifies two and the information in each classification is the same, one classification would be dropped) or removed from the dataset.

Permit Sales and Survey Sample Summary

The total deer permits sold in Kansas for the 2021-22 deer season was 175,143 (Fig. 1), which is a decrease of 4.20% from 2020-21 and 2.34% below the five-year average. Most of the decreases were in resident over-the-counter permits. Non-resident permit sales have been relatively steady since most non-resident permits are limited availability with quotas, but slight variation occurs with Hunt-Own-Land permits.

All Deer Permits Sold by Residency 2010-2021

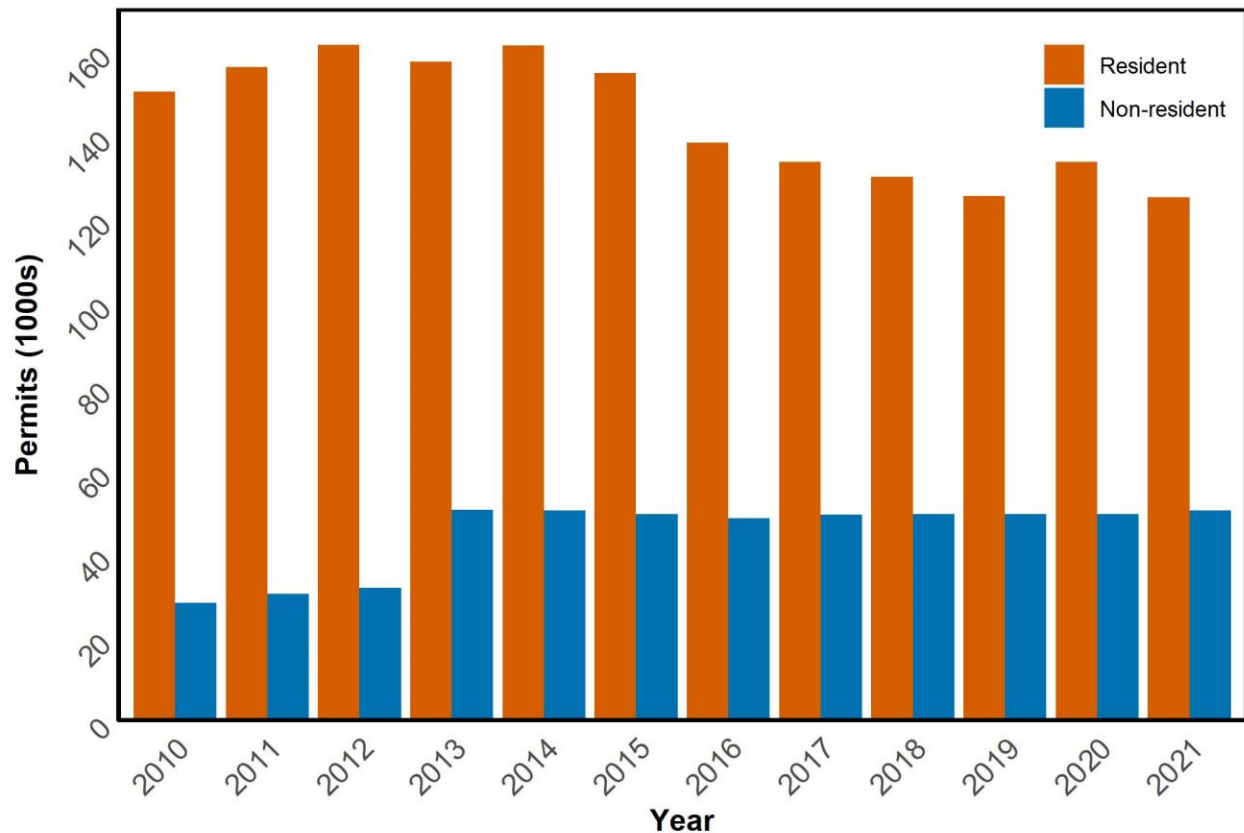

Figure 1. Deer permit sales 2010 to present. Resident sales (orange) have declined the last three years. Non-resident sales have remained steady since most non-resident permits are limited availability through the random draw, variation in non-resident permits is typically due to changes in the number of hunt-own-land or white-tail antlerless only permits sold.

Deer hunters in Kansas are limited to one permit allowing the take of an antlered deer (the buck permit; all permits allowing an antlered deer to be taken are either sex permits) and must purchase this permit before they may purchase antlerless-only permits unless they purchase antlerless only permits after December 30. During the 2021-22 deer season, hunters purchased 106,544 buck permits. A total sample size of 40,000 was drawn from hunters purchasing buck permits to receive the Kansas Deer Harvest Survey. The 40,000 hunters are sampled in proportion to the number of each type of permit sold. Thirty-two thousand hunters receive an email invitation with a weblink to participate in the survey. Eight thousand hunters are mailed a postcard with a weblink they may use to participate in the survey. Additionally, 3,500 bowhunters receive a paper form of the Deer Harvest Survey as part of participating in the Bowhunter Observation Diary, which they mail mail-in or follow the included weblink. All surveys include a hunter's KDWP number to prevent duplicate surveys from being included as part of the results. The actual number of email invitations sent in the 2021-22 post-season was 36,688, due to incorrect emails, closed emails, etc. Postcards were sent to 6,262 hunters. There was a total of 10,906 usable responses were received. Recent changes in international privacy

law prevented surveying youth hunters under 16, therefore all youth data were included in the equivalent general resident category. All nonresident draw permits were issued through the draw. No leftover permits were available for the 2021-22 deer seasons.

Statewide Deer Harvest

The 2021-22 statewide deer harvest of 84,007 an increase of 881 deer from the previous season's harvest. Harvest in 2021-22 was 2.85% above the three-year harvest average of 81,678 and was 3.36% above the five-year harvest average of 81,274 (Fig. 2). The 2021-22 deer harvest was the highest since 2016 and was the 12th highest harvest in Kansas since modern deer hunting seasons began in 1965; the highest was the 2000 season, when 111,159 deer were harvested.

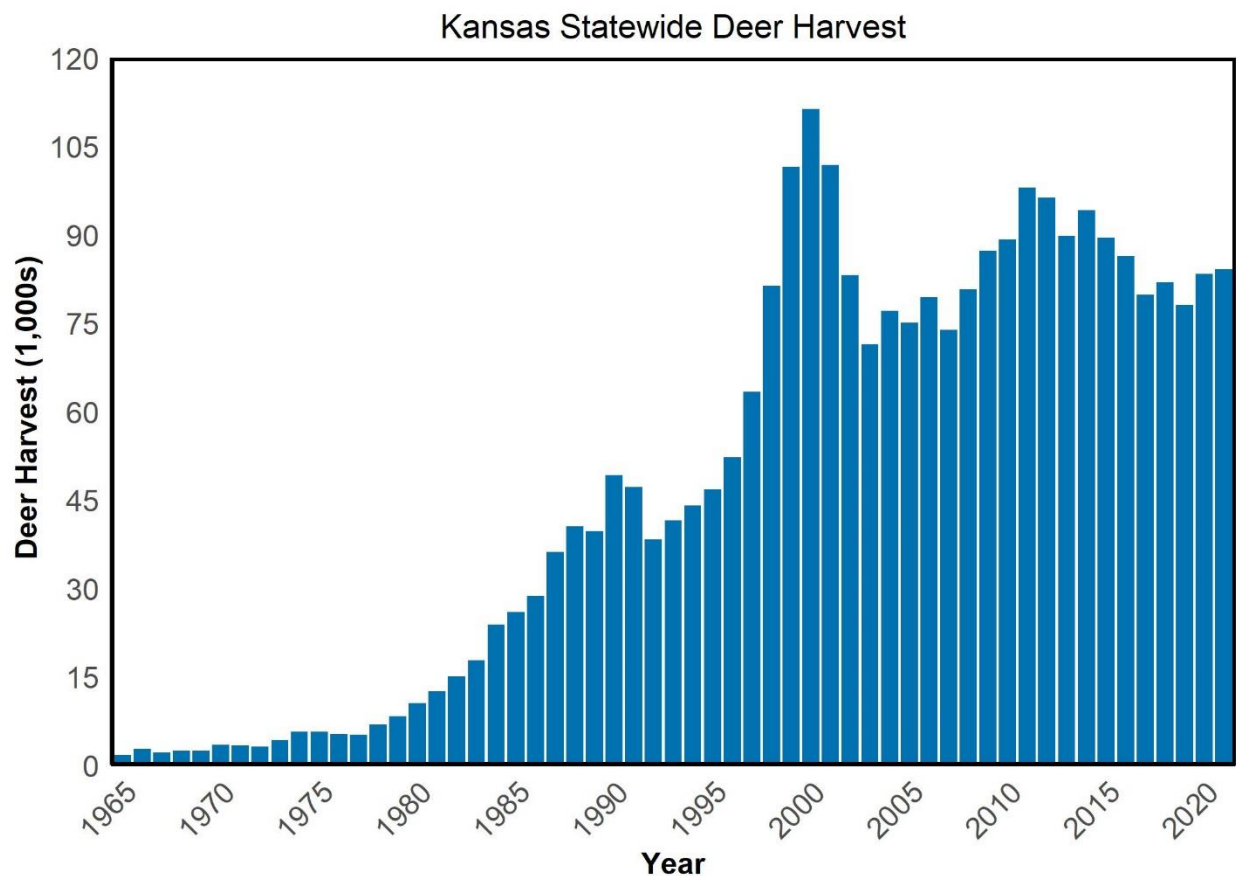

Figure 2. Kansas statewide deer harvest 1965 to present. Greatest harvest occurred in 2000 (111,159) lowest harvest occurred in 1965 (1,504). The first modern deer hunting season in Kansas was held in 1965.

Resident hunters hunted at a slightly lower rate (92.6%) than non-resident hunters (95.9%), although 94.2% of all hunters who purchased a deer permit spent time afield. Residents had a slightly higher rate of successfully harvesting a deer than nonresidents. KDWP again, for the

third consecutive season, did not offer Either Species Antlerless Only permits to limit female mule deer harvest. The total mule deer harvest (1,724) was slightly higher than the previous season (1,772) and the number of antlerless mule deer harvested (128) decreased from 2020-21 (167). Mule deer harvest made up 2.05% of the total deer harvest (Table 1). The total antlerless deer harvest made up 46.2% of the total deer harvest, which was similar to the 2020-21 season (46.6%). Deer harvest estimates by species, sex, and age for each Deer Management Unit are included in Appendix 1.

Table 1. Kansas state-wide deer harvest by species, sex, and age in 2021-22. Non-resident permit classes are gray shaded.

^aChanges to privacy laws prevented surveying youth hunters in separate categories, youth hunters were included in corresponding general hunter categories.

Statewide Harvest by Weapon Category

A greater proportion of deer were harvested by centerfire firearms (Table 2) than any other, but compound bows were the next most popular weapon choice. Pistols were the least used method (0.15%) of harvest although shotguns with slugs (0.16%), recurve or longbow (0.77%) and traditional muzzleloaders (0.51%) were also little used. As a group, muzzleloader hunters killed only 2.8% of the overall deer harvest. In 2021-2022 archery methods were used to harvest 42.7% of all deer harvested, up from 39.9% in 2019-20. The proportion of the archery harvest by crossbows increased by 3.2%, and accounts for 35.1% of deer harvested by archery methods and 15.0% of the overall deer harvest (Fig.3).

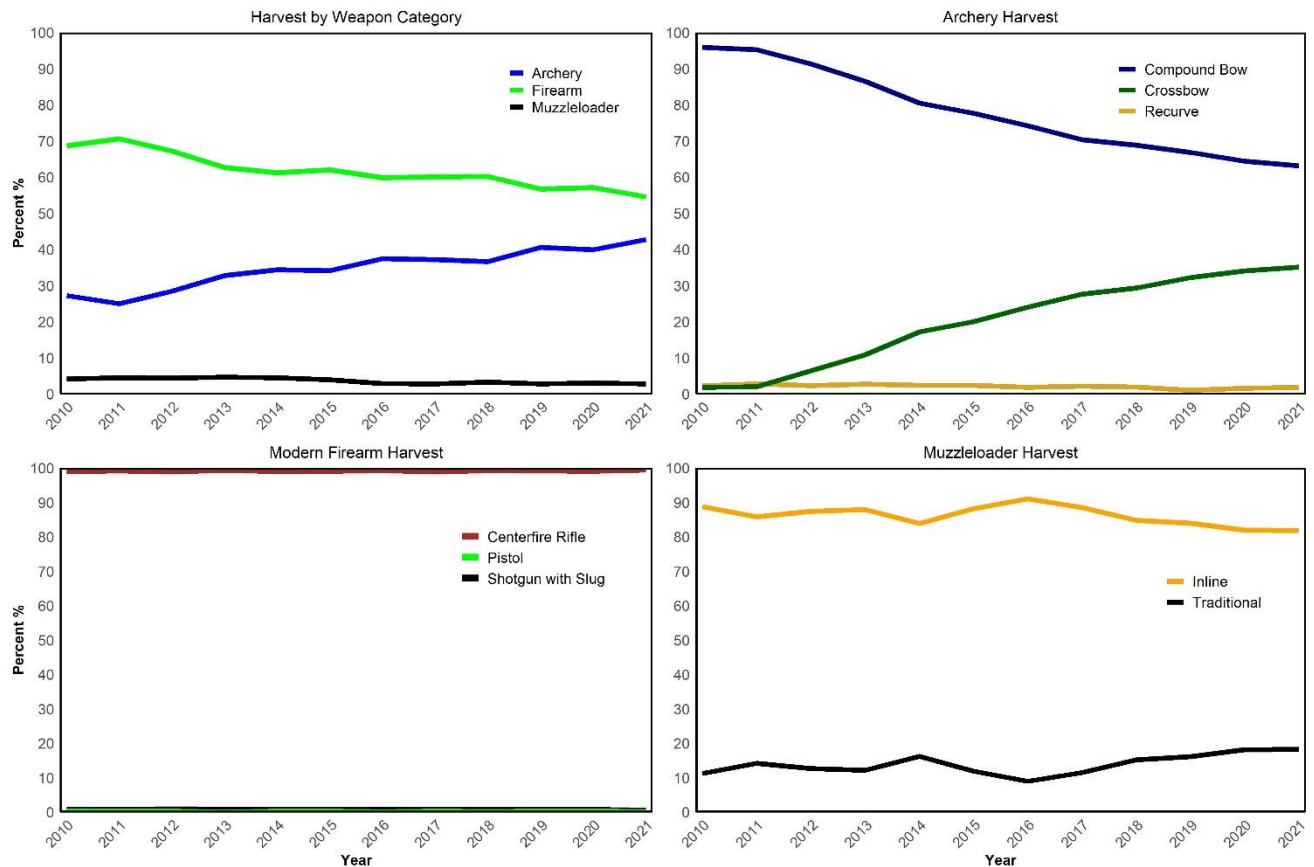

Figure 3. Proportion of harvest by weapon category and proportion of harvest by sub-category within weapon category. The proportion of deer harvest by archery methods has increased while the proportion of harvest by firearms methods has decreased. The proportion of deer harvest by weapon sub-category has remained steady within the weapon categories, except for crossbow and compound bow sub-categories in the archery harvest category.

Table 2. Kansas state-wide deer harvest by weapon type in 2021-2022. Non-resident permit classes are gray shaded. Unfilled permits may be used as a firearm whitetail antlerless permit during January antlerless seasons, thus there may be deer legally harvested with firearms on an archery permit. Totals may not match estimated harvest due to rounding.

Hunter Use and Deer Harvest on Public, Private, and WIHA Properties

Kansas has multiple types of land available for hunters to utilize. Most land in Kansas is under private ownership. A portion of privately-owned land is open to public hunting through the Walk-In Hunting Access Program (WIHA). During the 2021-22 deer season 1,180,000 acres of WIHA was available for public hunting. There were also approximately 390,000 acres of state and federal land, much of which is specifically managed to maximize wildlife resources. The value of these publicly accessible properties to deer hunters in Kansas can be seen by the proportion of the total deer harvest that comes from those properties. Public land makes up % of land in Kansas, yet % of the total estimated deer harvest occurs on those properties (Table 3). The proportion of deer harvest on WIHA properties is %, but WIHA properties account for % of Kansas. Private property not in WIHA accounts for the remaining % of land and % of deer harvest, respectively.

Table 3. Hunter Use and Deer Harvest on Public, Private, and Walk-In Hunting Access Property. Non-resident permit types are grey shaded. The sum of the number of hunters using property types exceeds the total number of hunters as a hunter may use more than one property type. All hunter activity and harvest are accounted for on a hunter's buck permit, thus no whitetail antlerless only permit categories are included.

Hunter Participation by Season

During the 2021-22 deer seasons, only the muzzleloader and archery seasons had a greater than expected proportion of participation by non-residents. Of the three major seasons (muzzleloader, archery, firearms), firearms season has the greatest proportion of participation by Kansas residents at 86.0%. Seasons that limited harvest to antlerless deer, are proportionally more heavily participated in by residents. While most antlerless seasons are specific to deer management units and occur after seasons allowing antlered deer harvest; the proportion of participation in the Pre-rut season, which is available statewide, was 97.6% Kansas resident and only 2.4% non-resident. The same applies to seasons that limit participation to a specific segment of the hunter population like the designated persons season (Youth/Disabled Season) at 91.8% resident participation. A slightly greater than expected proportion of residents indicated that they did not participate in any season and did not hunt at all.

Table 4. Number of hunters participating in each season. Non-resident permit classes are grey shaded. Totals may exceed permits issued as hunters may participate in multiple seasons with the appropriate permit(s). All seasonal participation is included in a hunter's buck permit classification.

Hunter Days Afield

During the 2021-22 deer seasons hunters in Kansas spent over 1.26 million days hunting deer (Table 5). Not including antlerless permits, residents averaged 12.1 days hunted per permit purchased, while non-residents averaged 7.4 days hunted per permit purchased. General resident and youth hunters who held a statewide archery permit hunted the second most days per permit at an average 17.4 days, behind resident landowner/tenants holding a statewide archery permit hunted second most averaging 18.0 days per permit. Resident general residents and landowner/tenants with an Any Deer Permits hunted the fewest average days per permit at 5.2 days. Among non-residents the most days hunted were by hunters using a Nonresident Tenant Hunt-Own-Land permit at an average of 9.7 days per permit, while non-residents with a whitetail either sex permit hunted on average of only 4.9 days per permit.

Table 5. Hunter Days Afield by Season. Non-resident permit classes are gray shaded. All hunter activity in days afield are included on a hunter's buck permit classification, including whitetail antlerless only permits, thus a hunter with a muzzleloader permit may hunt during archery season, with archery equipment for antlerless whitetail deer if they held an antlerless whitetail deer permit.

^aChanges to privacy laws prevented surveying youth hunters in separate categories, youth hunters were included in corresponding general hunter categories.

Date of Harvest

Deer Harvested by Date

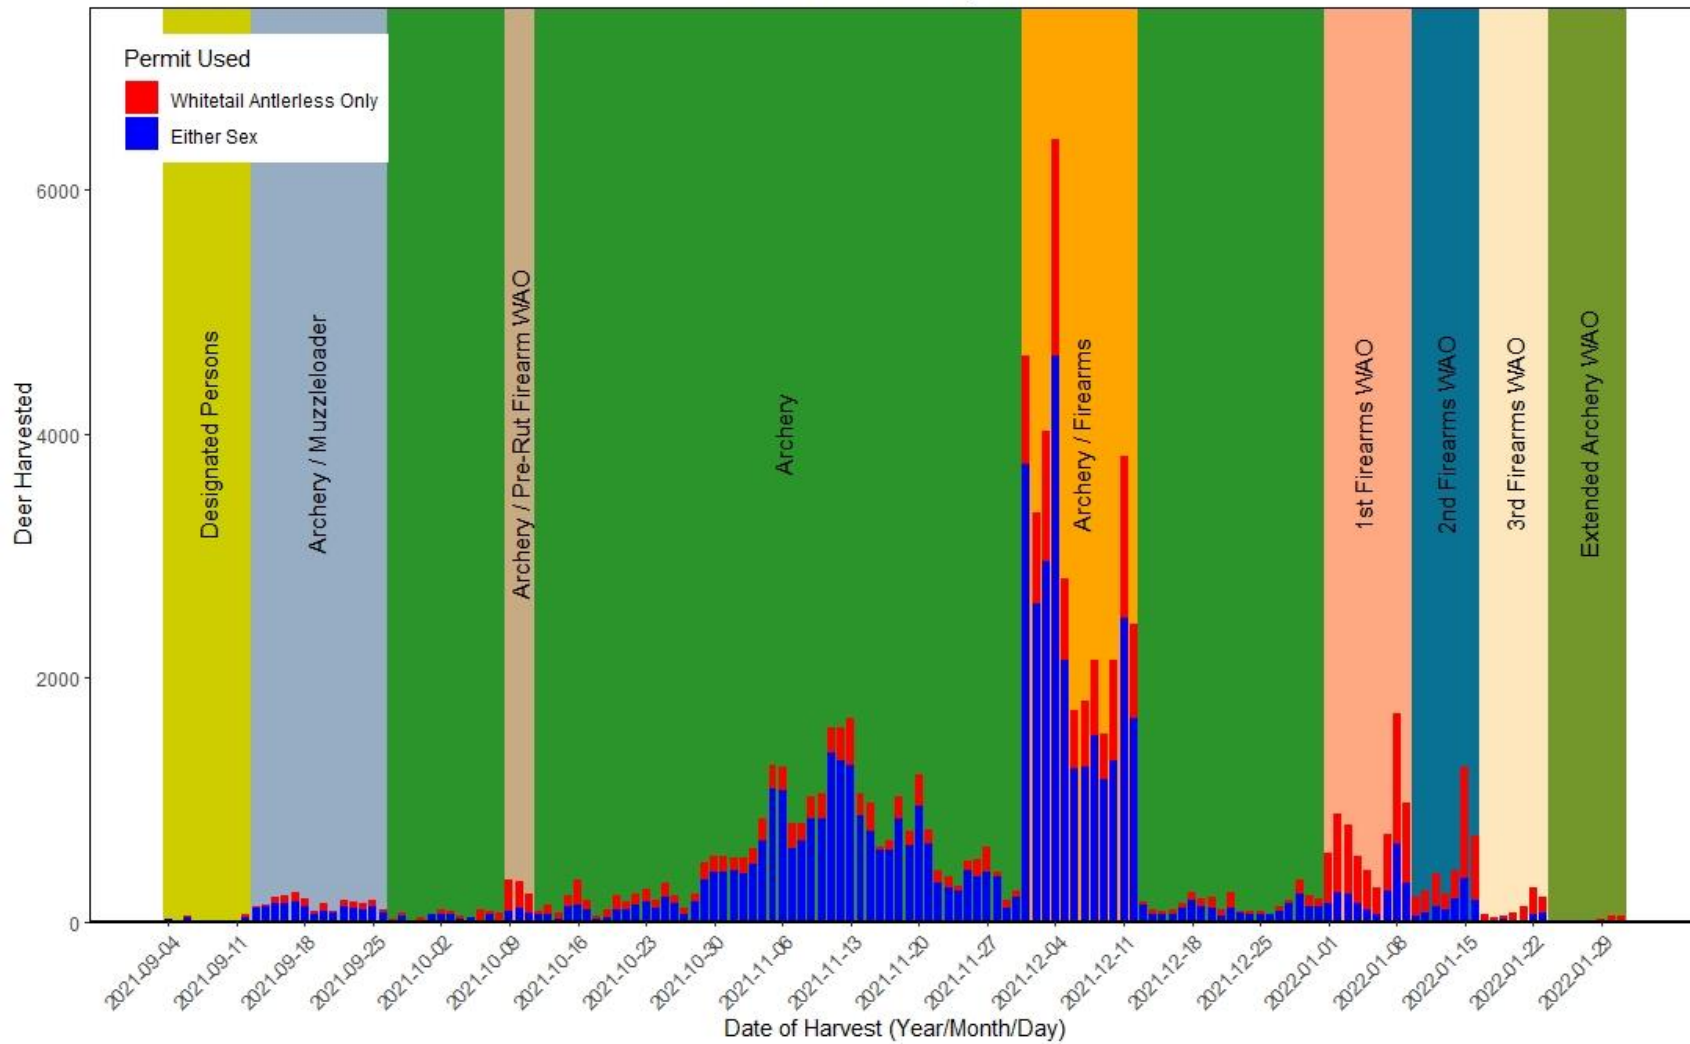

Figure 4. Deer Harvest by Date. Harvest is split by permit type used as either the Either Sex permit (Buck permit) and Whitetail Antlerless Only permit. Dates (Year-Month-Day) labeled on the x-axis are Saturdays during the 2021-22 season. Open seasons are indicated by background colors spanning the season dates.

Hunter Satisfaction

Satisfaction of Kansas deer hunters was largely tied to whether they harvested a deer (Table 6). A greater number of hunters that harvested a deer also completed the satisfaction portion of the survey. In general, hunters harvesting a deer displayed greater satisfaction rates than those that did not. Non-residents were also likely to display greater satisfaction than residents.

Table 6. Hunter Satisfaction by Residency for 2020-2021 Deer Season. Harvesting a deer is closely tied to hunter satisfaction.

Residency	Did they harvest a deer this season?	Hunters Completing Satisfaction Question	Percent (%) Extremely Dissatisfied	Percent (%) Dissatisfied	Percent (%) Mildly Dissatisfied	Percent (%) Neutral	Percent (%) Mildly Satisfied	Percent (%) Satisfied	Percent (%) Extremely Satisfied	Percent (%) Dissatisfied Total	Percent (%) Satisfied Total
Resident	No	3418	6.70	6.11	9.42	21.04	12.00	29.61	15.13	22.24	56.73
Resident	Yes	3924	1.55	1.86	3.08	5.25	8.41	36.26	43.58	6.50	88.25
Non-resident	No	1418	3.67	3.67	5.92	9.45	10.30	34.20	32.79	13.26	77.29
Non-resident	Yes	1571	0.83	0.57	1.72	1.21	4.71	27.24	63.72	3.12	95.67

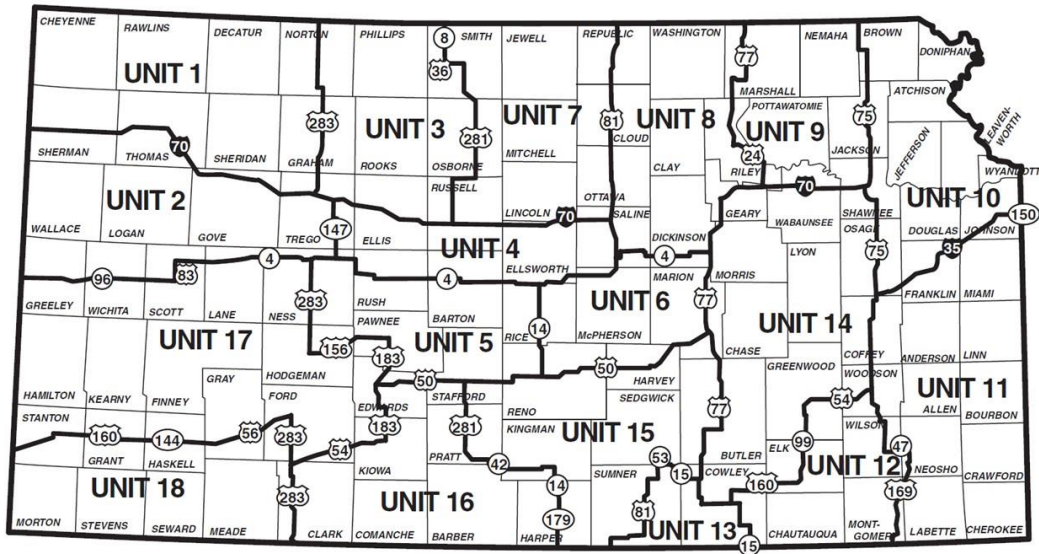

Total percentages may be slightly under or over 100% due to rounding.

Special Section

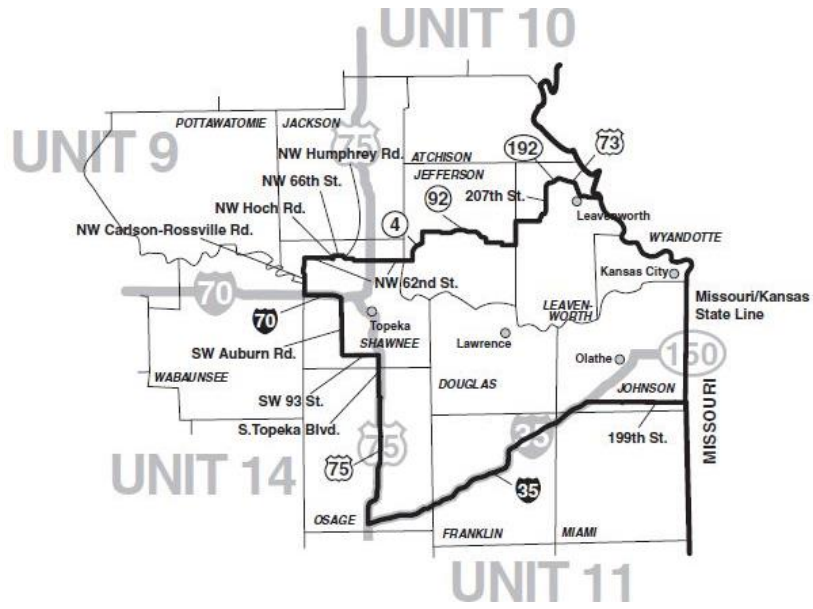

Appendix 1. KS Deer Harvest by Species, Sex, and Age for Each Deer Management Unit

The total estimated deer harvested across all deer management units may not match the statewide estimated total harvest due to rounding. Surveying youth hunters was prevented by changes to privacy laws, youth permits are included with the general permits of the same type.

^aDMU 19 deer harvest data only estimates antlerless deer harvested using a hunter's second to fifth antlerless permit. Antlered and antlerless deer harvested on an either sex permit or antlerless deer harvested on the first antlerless permit are estimated in the respective original DMU's harvest estimate, typically DMU 10, but also could be DMU 9, 11, or 14. This way the harvest estimate for DMU 19 reflects only the additional antlerless deer harvest DMU 19 was created to achieve.
